

NATURE VIEW PARK ADVISORY COMMITTEE

Town of Amherst

If you enjoy the park and the wonderful environment it offers, please consider becoming involved with the Nature View Park Advisory Committee. One of our goals is to provide more accessibility to Nature View Park for residents, visitors, and student groups, and through informative signage, provide an opportunity to experience the variety of habitats, flora and fauna found within the park.

We are an active group and enjoy working on projects in the park. We are currently marking primary trails and opening secondary trails. Several other projects are planned to enhance the park experience such as identifying park flora and various habitats.

A new parking lot has been constructed on Sweet Home Road across from Glenhaven. The lot will accommodate at least ten cars and was designed to also accommodate school buses for future field trips.

Meetings are held the second Wednesday of the month at 5:00 PM at Town Hall.

Please email amherstarboretum@roadrunner.com for additional information.
