# ABOUT

**Town of  
Amherst Youth  
& Recreation  
Department**

## PARKS FOR ALL

The Amherst Town Parks system includes 32 unique and well-loved parks that serve as vital community spaces for play, relaxation, events, and connection to nature. Operating under the Amherst Youth & Recreation Department, a team of dedicated park professionals is tasked with developing and delivering high-quality, inclusive programs and special events that meet the needs of all park guests. These professionals work year-round to ensure that the Town's parks continue to be safe, accessible, and engaging for residents and visitors of all ages and abilities.

A cornerstone of this effort is the Amherst Parks Inventory, a comprehensive, annually updated report that documents the condition, amenities, and accessibility of every park in the system. This inventory is much more than a list of features—it is a vital planning and communication tool used by park professionals, maintenance crews, and administrative staff. For park professionals, it informs program planning, helps identify opportunities for new or improved amenities, and ensures that events are appropriately placed to maximize community benefit. For maintenance workers, the inventory serves as a reference for identifying repairs, routine upkeep, and accessibility improvements. For the public, the inventory increases transparency, helping residents and visitors understand what each park offers and how to best enjoy these spaces.

Each year, the team visits every park in person to evaluate its features and functionality firsthand. This regular assessment allows the department to respond to community needs, make data-informed decisions, and remain aligned with the Town of Amherst Parks and Recreation Master Plan (2017). The Master Plan provides a long-term vision for the parks system, and the inventory ensures the Town stays on track with both maintaining successful programs and introducing new, innovative offerings.

Through thoughtful planning, on-the-ground experience, and a commitment to accessibility and continuous improvement, Amherst's parks professionals strive to ensure that every park remains a welcoming, well-maintained, and dynamic space for all to enjoy.

# NATURE AND CONSERVATION AREAS

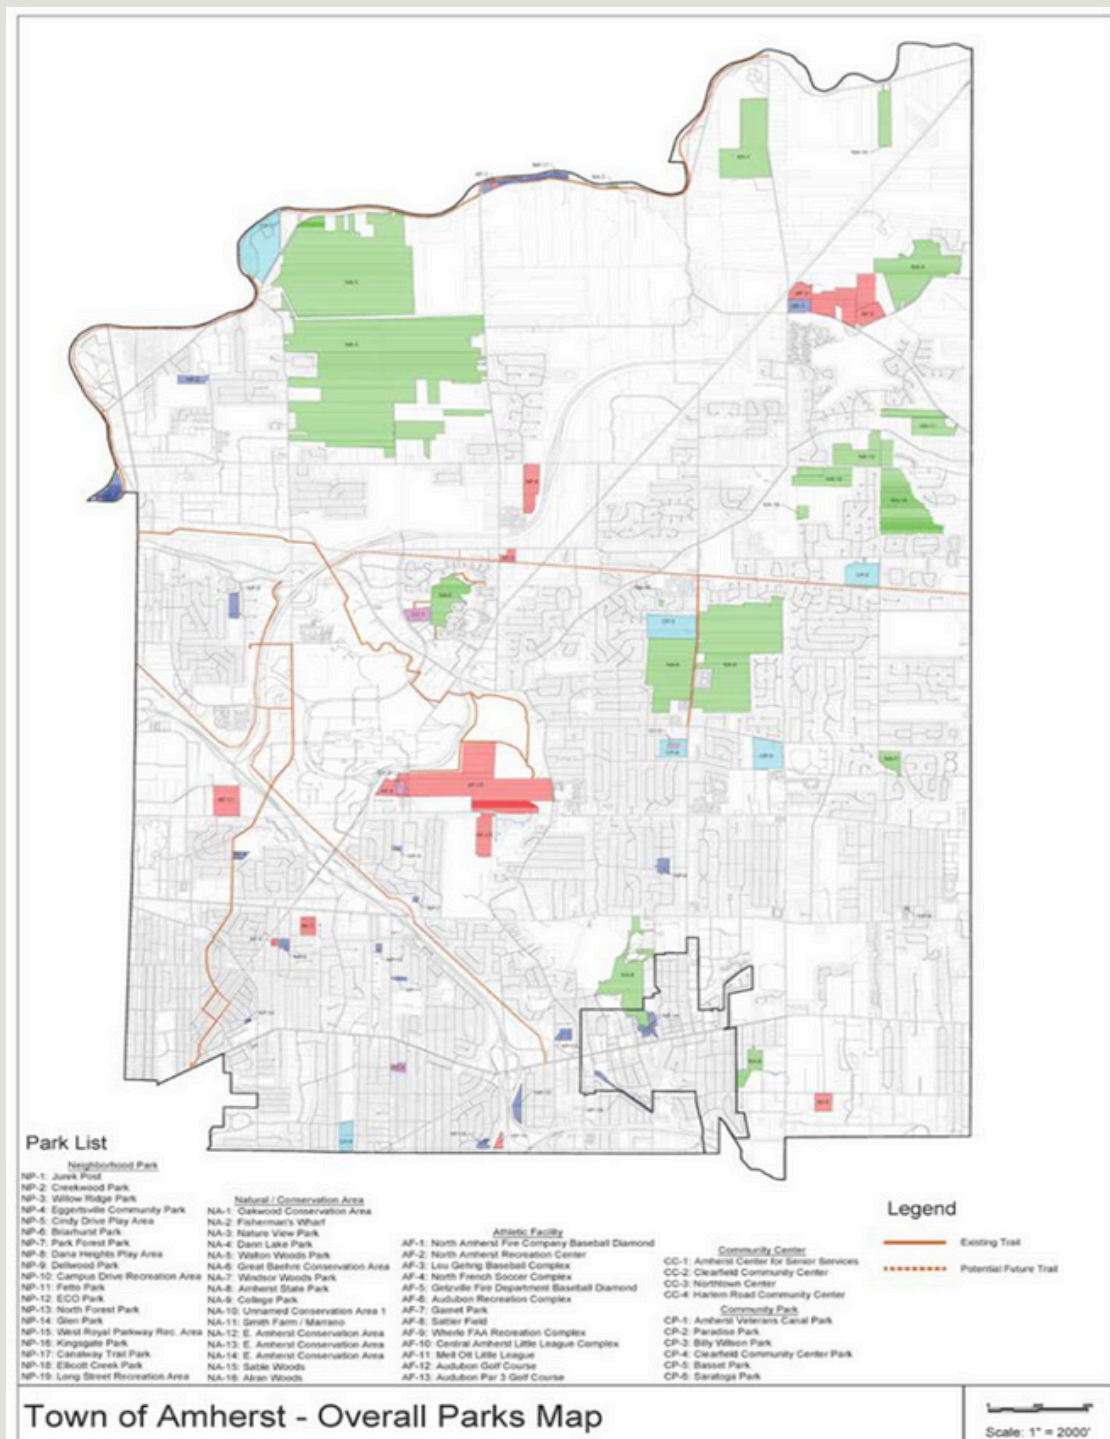

Nature and Conservation areas (noted in green in the map below) in the Town of Amherst are best defined as spaces with limited or no existing development, and which have limited accessibility to the public. While limited in accessibility, these areas include natural and/or protected space including greenspace, wooded space, and wetlands. These spaces have mostly passive recreation available to users. Nature and Conservation areas with limited or no public access include:

*Oakwood Conservation Area*

*Windsor Woods Park*

*College Park*

The areas noted above are not recommended for public use for the purposes of recreational or passive use.
